

AVINASH KUMAR

Full Stack Web Developer (MERN | Next.js)

9354497615 | akak2805034@gmail.com | github.com/Avinash12122002 | linkedin.com/in/avinash-kumar

PROFESSIONAL SUMMARY

Full Stack Web Developer with hands-on, production experience building and shipping responsive, scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), Next.js with TypeScript, and WordPress. Currently working as a sole full stack developer for a travel and immigration services company, independently owning the entire development lifecycle — requirement gathering, UI/UX design, coding, testing, deployment, and maintenance — for live business websites and an internal CRM system. Skilled in JavaScript (ES6+), TypeScript, REST API design and integration, and database management. Experienced in Agile SDLC, end-to-end product ownership, debugging, and self-directed project delivery. Passionate about delivering high-performing, user-centric digital products that drive business value.

TECHNICAL SKILLS

- Languages: JavaScript (ES6+), TypeScript, Python, Java, C++, C
- Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, WordPress
- Backend: Node.js, Express.js, REST API Design & Integration
- Databases: MongoDB, MySQL
- Tools & Concepts: Git, GitHub, Postman, VS Code, SDLC, Agile Development, Debugging, Code Reviews, CRM Systems, Web Hosting & Deployment

EXPERIENCE

Full Stack Developer — Growworld Vijatour Pvt. Ltd. | On-site

May 2026 – Present

- Working as the sole developer for the company's digital platforms, independently owning the complete development lifecycle — requirement gathering, design, coding, testing, deployment, and ongoing maintenance — for all websites and internal tools.
- Built and deployed tmsvisa.com, the company's primary visa services website, using the MERN stack (MongoDB, Express.js, React.js, Node.js) integrated with WordPress for content management.
- Developed triloknathimmigration.in, an immigration consultancy website, using the MERN stack integrated with WordPress for easy client-side content updates.
- Built crm.tmsvisa.com, a full stack CRM application using Next.js and TypeScript to manage leads, client records, and case tracking, streamlining internal workflows for the sales and operations teams.
- Gathered requirements directly from stakeholders and translated them into technical specifications, UI designs, and database schemas without a dedicated design or QA team.
- Designed and implemented REST APIs and MongoDB schemas to support real-time data across the company websites and CRM platform.
- Handled end-to-end testing, bug fixing, and production deployment for all three platforms, along with ongoing performance monitoring and maintenance.

Frontend Development Intern — IBM | Remote

Jul 2025 – Aug 2025

- Collaborated in a 5-member team to design and develop responsive frontend components using React.js, HTML, CSS, and JavaScript within an Agile SDLC environment.
- Translated complex user requirements and wireframes into accessible, modular, and reusable UI components.
- Supported testing and debugging processes to ensure cross-browser compatibility and performance optimization.

Full Stack Intern — UpToSkills | Remote

Mar 2025 – Jun 2025

- Led an 8-person core team (coordinating across 30 developers) to develop an AI-driven assessment platform using React, Node.js, Flask, and MongoDB.
- Delivered 10+ key modules including quiz generation, HR & candidate dashboards, analytics, and proctoring systems within a 3-month sprint.
- Reduced quiz setup time by 80% through automated workflows integrated with the Gemini AI API.
- Encouraged team collaboration through sprint planning, task delegation, and regular code reviews.

PROJECTS

tmsvisa.com — *MERN Stack, WordPress*

- Built and deployed the company's primary visa services website using MongoDB, Express.js, React.js, and Node.js, integrated with WordPress for content management.
- Handled end-to-end development — requirement gathering, design, coding, testing, deployment, and maintenance — as the sole developer.

triloknathimmigration.in — *MERN Stack, WordPress*

- Developed an immigration consultancy website using the MERN stack integrated with WordPress for easy client-side content updates.
- Independently managed the full project lifecycle from requirements through deployment and ongoing maintenance.

crm.tmsvisa.com — *Next.js, TypeScript, MongoDB*

- Built a full stack CRM application using Next.js and TypeScript to manage leads, client records, and case tracking for the sales and operations teams.
- Designed and implemented REST APIs and MongoDB schemas to support real-time data across the platform.

Online Assessment Test — *React, Tailwind CSS, Node.js, Flask, Gemini API*

- Built a role-based login system (HR & Candidate) with secure authentication and database management.
- Integrated Gemini API to auto-generate 100+ quiz questions in under 20 seconds.
- Developed real-time proctoring features (webcam monitoring, tab detection, eye-tracking) to maintain test integrity.

Additional Projects — *Node.js, MongoDB, JavaScript, Three.js*

- Airbnb Clone (Node.js, Express.js, MongoDB, EJS, Tailwind CSS) — Implemented CRUD operations for property management with secure login/signup flows; designed a clean, interactive interface for hosts to manage listings and guests to book accommodations.
- Grocery Shop Website — Cart & billing system with responsive UI.
- Gemini Quiz Generator — Added PDF/CSV export, categories, and database persistence.
- Solar System Simulation — Interactive 3D visualization of planetary motion using JavaScript (Canvas API/Three.js), enhancing learning through real-time animations and orbit controls.

EDUCATION

M.C.A. (Software Engineering) — USICT, GGSIPU	2024 – 2026 CGPA: 8.8
B.Sc. (Computer Science) — Rajdhani College, Delhi University	2020 – 2023 CGPA: 8.5
Senior Secondary (12th), CBSE	2019 – 2020 85%
