

European Employer Intelligence Platform (EEIP) - Workflow Blueprint

Objective: Automate employer research, qualification, prioritization and outreach for European employers hiring general labour from India and Nepal.

1. BDM pastes Company URL
2. Crawl website (About, Careers, News, Contact)
3. Extract company profile (industry, size, locations, growth)
4. Analyze hiring (careers, LinkedIn, Indeed, EURES)
5. Detect overseas hiring history / first-time employer
6. Predict labour shortages using hiring & expansion signals
7. Discover decision makers (HR, Ops, CEO etc.)
8. Calculate AI Opportunity Score (High/Medium/Low)
9. Recommend outreach strategy
10. Generate personalized introduction email
11. Schedule Follow-up #1 (3 days if no reply)
12. Schedule Follow-up #2 (after next interval)
13. Sync to CRM & track outcomes
14. Learn from results to improve scoring

Module	Purpose
Company Intelligence	Website crawl & profile
Hiring Intelligence	Vacancies & demand
International Hiring Detector	Existing vs first-time
Labour Predictor	Forecast workforce demand
Decision Maker Finder	Identify contacts
Scoring Engine	Prioritize employers
Email Engine	Personalized outreach
Follow-up Engine	Automated reminders
CRM	Pipeline & analytics
Learning Engine	Improve AI over time
